:)

Hi folks,

Just a note about an unusual aspect pattern that came into play today, which is made of 3 quincunx aspects, as well as two sesquialter and a sextile.

Given the speed that the fastest planet involved here is Mars, we can appreciate that such setups are probably quite rare.

Whilst, most of us are familiar with the yod or finger of God, located between Mars, Jupiter and Pluto, we should be aware of 2 more yods that will form, before month's end.

24092005 = yod = Mercury + Saturn + Uranus

30093005 = yod = Sun + Saturn + Uranus

..... all the while, that Mars + Jupiter + Pluto yod remains in play.

Chart above, is not unlike Crowley's devil star, made from an inverted pentacle star, which is also part of our tetragrammaton

More later ... :)

happy days

yogi
