Hi folks,

Progressions and directions are a valid form of astrochart analysis, when applied properly.

Remember, these tools were developed for use in personal astrology and have only been adapted for use in a financial sense.

However, in the initial stages of learning financial astrology, many simpler astrotools have been specifically developed for trading purposes, that may be applied with good results.

For advanced students, exploring progressions and directions, some of the old astrologers have presented us, with some deep insights into these subjects:

"Progressing the Horoscope - Hermetic System of Progressions" by C. C. Zain ISBN 0-87887-260-4 and 0-87887-342-2

"The Radix System" by Vivian E Robson - directional charts.

"Directions and Directing" - Alan Leo's Astrological Manual No 5

"Progressed Horoscope" - Alan Leo's "Astrology for All Series" Vol 5.

"The Progressed Horoscope Simplified" by Leigh Hope Milburn

..... and there's a mountain of other books from other authors, as well as additional information on the web.

happy days

yogi
