

When Sammy Shovel sinks his teeth into a case—he gets to the bottom of it—no matter how many bullets are flying at him.

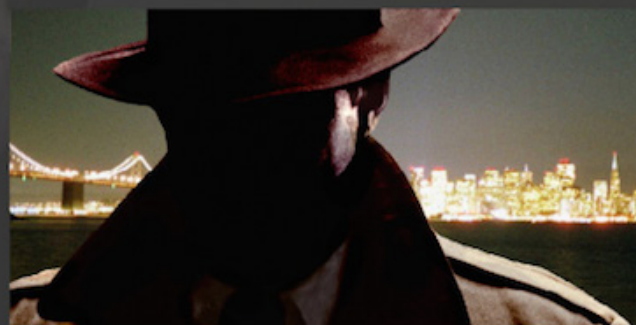

Private Investigator, Sammy Shovel, is short, slightly overweight, balding, and he dresses like San Francisco's most squalid street people. When a supposed heist falls into his lap, Sammy jumps at the chance to make a few bucks, from an unknown

victim, by stopping what appears to be a simple robbery. However, the case turns out to be different than any thing he's taken on since the death of his partner. Sammy finds himself speeding through streets of San Francisco to head off another senseless murder. The events that follow are beyond his comprehension, and will change his perception of crime forever.

The victim may not be as evil as it seems, but rather—a casualty of circumstances.
