Author Excavates the Ingredients of God

For Millennia People Have Worshipped God; but What is He? Rather Than Re-examine His Personality, A Prophetess Scrutinizes the Substance of God.

Grand Prairie, Texas, (first release) December 22, 2007 - A long way from being just another religious book, *The Beginning of God* gives a unique, first-hand account of Lucifer's relationship with God and God's resulting, death-defying bounty hunt, as a side effect of the angel's rebellion. Written in an exciting style, it explains how and why the components of a "heartbroken" God were forced to construct and live in a house of skin and bones. The book aims to free the human psyche from God's "personality" and nurture our unspoken desire to return to the immortal dis-ease from which we came.

The Beginning of God is a series of spiritual visions experienced by Prophetess Telhare'sha Dawkins over a period of six-years. Frustrated with the organized altering of who God is, she began to bring her notes together in a powerful storyline about what God is made of, where He came from and what He desires.

The Beginning of God is self-published and available online now for \$13.99 plus shipping and handling at www.amazon.com, www.target.com and www.createpace.com/3331856. It is one hundred and eight pages, including five chapters and a poetic epilogue, and is concise, relevant and exciting reading. Derrick Wilson, Senior Pastor of Kingdom of Life Church, has been a church leader for more than eleven years. He says *The Beginning of God* "is a timeless MASTERPIECE."
