

LIFE CYCLES

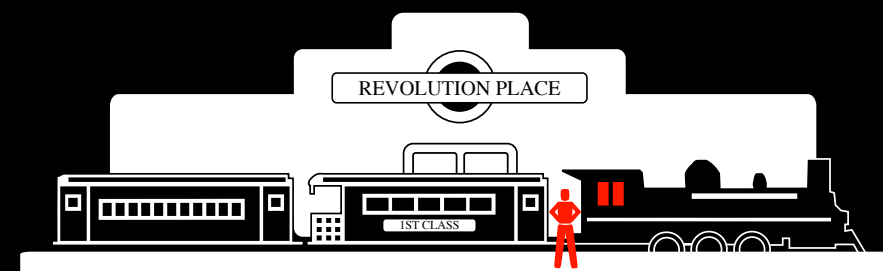

TAKE THE JOURNEY OF A LIFETIME ... YOUR OWN AND EVERYONE ELSE'S

NEIL KILLION

LIFE CYCLES is a ground-breaking new theory on what life is all about. It is both controversial and evidence-based and states that we live our lives in symbolically repeatable twelve year cycles. There are two important years and this is where we see fate take a hand in unusual ways.

Designed to entertain and inform; details from the public record are used to dissect the lives of world leaders, showbiz personalities, criminals and ordinary citizens. You will learn about your life's symbolic meaning and be introduced to a whole range of new terms and icons.

You won't read anything quite as original and intriguing and you will never look at your life the same way again.
