This book offers the readers a unique of several surrealism metaphors or structures, not an all time traditional publication described by the opinionated critics as a synthesis scriptures and dramatic non-fiction, even though the tremble has been done not utmost best of its acknowledgement to share the authentic experiences to certain readers with the essential themes of life molecular, social dialogues, metaphysical exploration and unintentional alienated particular contrasts. Yet diversifying phenomenon subjects to major procrastinated topics or neither revolutionary nor a protagonist in many ways that some writers might be introduced or brought together. The author is hopeful to make sense to the readers 'antonymic' minds, fortify their intelligence and beliefs that reading novels is supposed to be more than knocking out time and learning the creativity of artful language styles or grammar, - heightening, alleviating or mitigating the reader's perspective conception and contemplation. All characters represent the writers own interpretations and are written without any prejudice or malice intended. Moreover, it is wrong to generalize any case or topic of the author's books as a principle doctrine, when each matter could have its own merit. Therefore, the author is not fraught with subtle tension, but the power of Endeavour and a 'will' to acknowledge peculiarity and importance.

Indefinite defined public 'Torture'

According to the "United Nations Convention Against Torture" Is any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a male or female person for such purposes as obtaining from him, or a third person, information or a confession, punishing him for an act he or a third person has committed or is suspected of having committed, or intimidating or coercing him/her or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity. It does not include pain or suffering arising only from, inherent in, or incidental to, unlawful sanctions.

Dimensional awareness and perspective use of fatal, lethal electroshock devices that is not necessary to subdue a human in order to apprehend them. Associations undermining the public ability to question law enforcement that has led to many conflicts of interests such as: Excessive force, Medical examiners wrongfully rulings of deaths of Taser incidents to homicides, '**Excite delirium**', excuse of drug intoxication contributions and very little (Medical and Scientific) information about the nervous system and foreign body implants or fragile body organs that may affect surviving humans in a long run.
