accepting we live in the age of mobile technology, where people
are using there cell phone to work and play, again we regret
Antonio's Digital Painting Puzzles can not be completed on smartphones.

being it the digital size of the Paint program or competitors being unable to
create similar software, digital puzzles need to completed on laptops
and/or desktops with Microsoft operating systems.

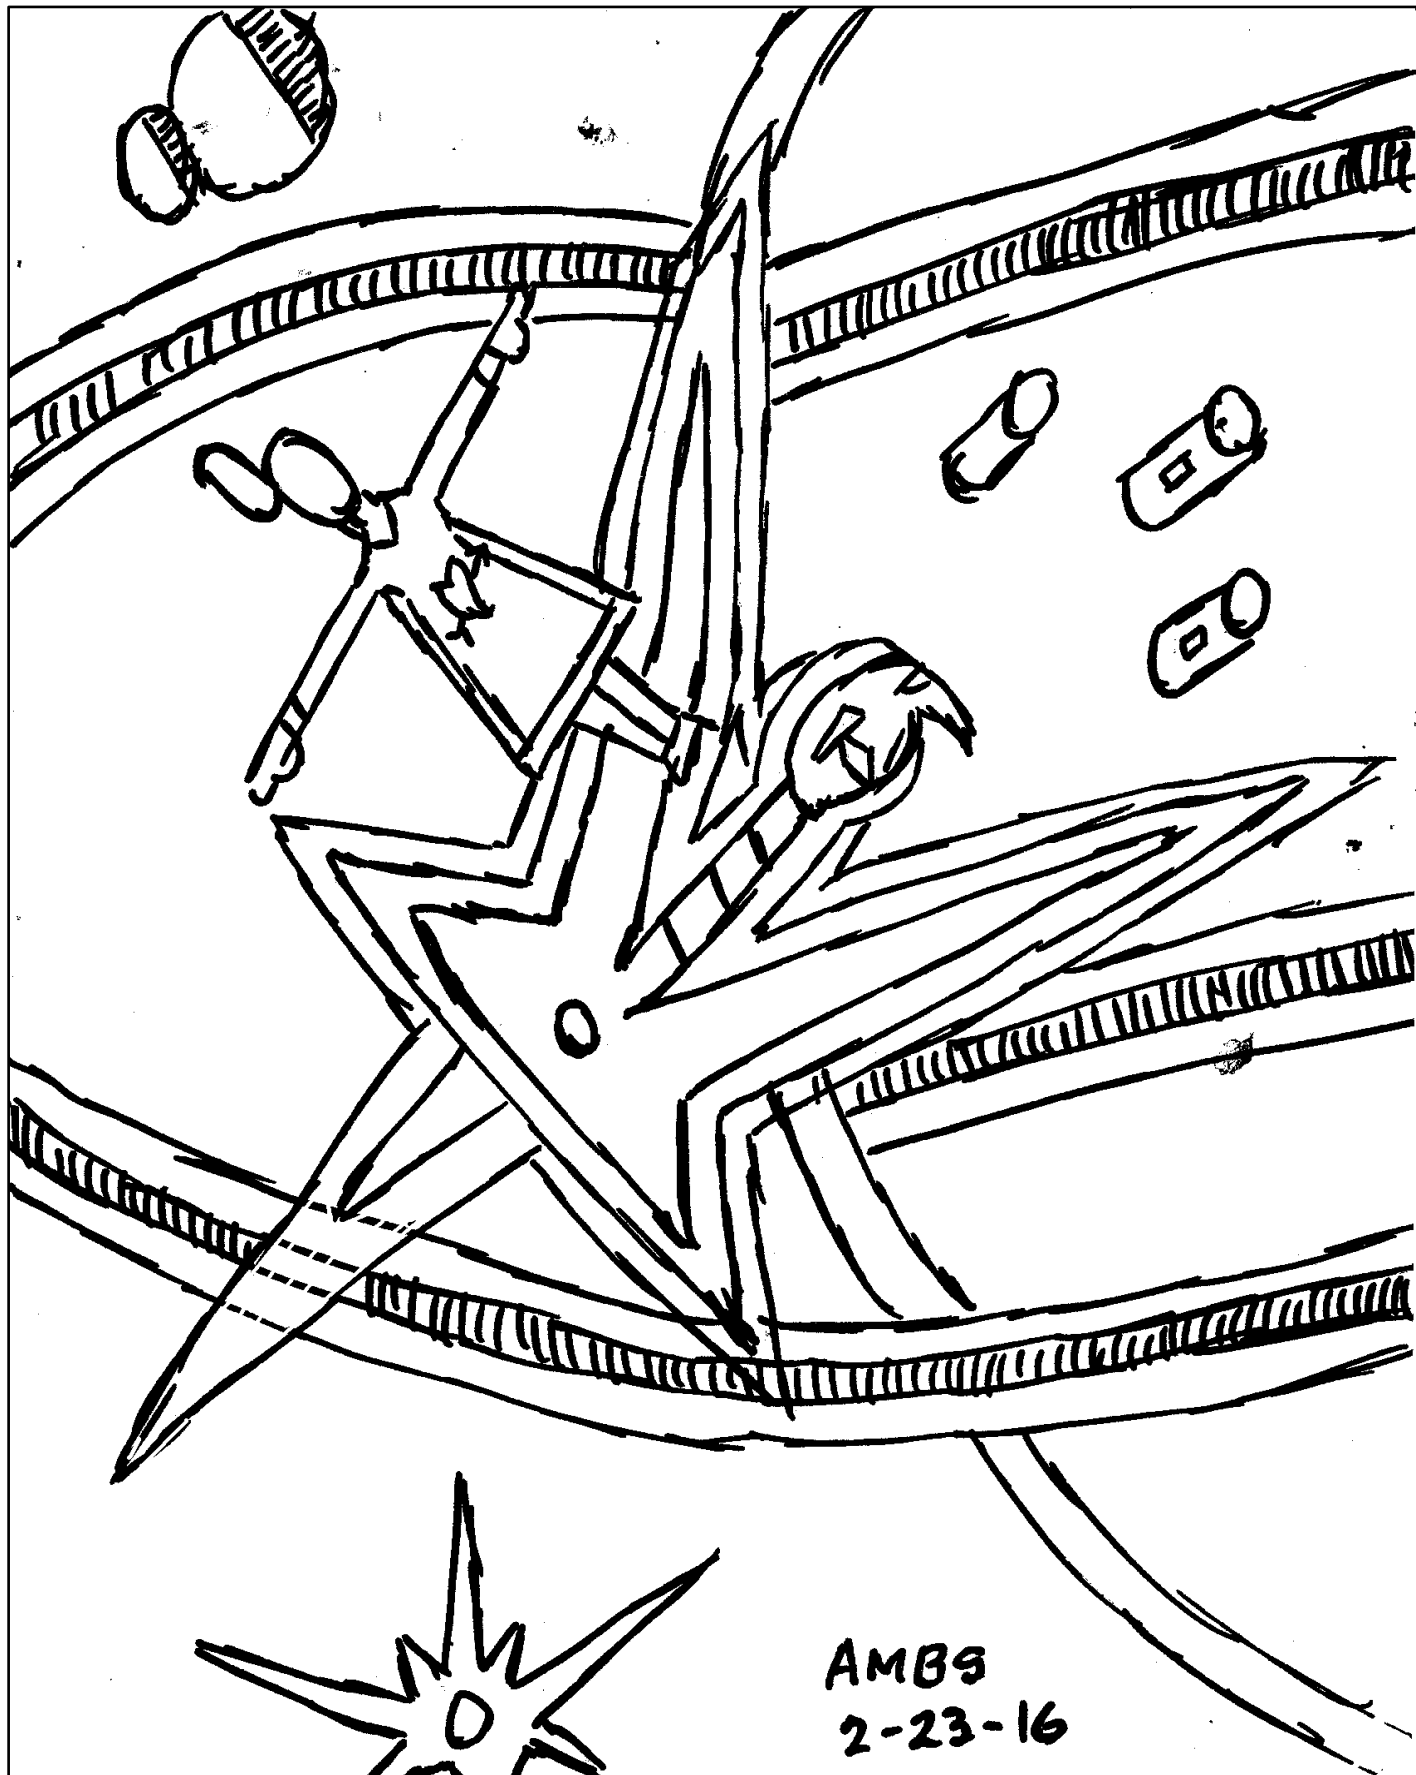

mastering the Paint Program is a challenging experience that is meaningful
to anyone interested learning more about photography and digital art.

the next few pages list my favorite Paint tools.
