The Time for Change Is Now
We Are All ONE, Fight to make it
happen and help...

KEEP IT THAT WAY!

Posted Again September 23, 2009

Note: I wrote this commentary almost two years ago, but I think people need to revisit some of the articles again, specifically this one! The roaches (elitists/bigots) are really showing their true colors today, they have lost their minds and are foaming at the mouth. The positive for progressives; they are coming out of hiding and we all know who they are now...LOOK TO THE RIGHT!

Commentary by Chris the Abducted Alien

Editor, Deon Paul

Originally Posted Saturday, January 26, 2008

Propaganda is a strong word, but it is definitely the correct one for this commentary. Citizens are continuing to feel that their liberty and freedom are being lost. I have been living this reality for over two years. It is not just a feeling for me; I have lost all freedoms because of laws that have been put into place by George W. Bush and the Representatives that have been elected to care for our Constitution and our rights as American citizens.

The feeling of most Americans is that the idea of the citizen having the power to change or alter the government to suit them is beyond their comprehension, and they do not know where to start or what to do...

Many citizens were sucked into the misinformation given to them over the past decade, by first hate disguised as outrage during the Clinton administration. Then by outrage again over the elections being slanted to one side through electoral votes that were manipulated during the election for the last President in 2000. Then by deception and fear as to what really happened on September 11, 2001, and on and on...This propaganda has in fact been occurring for several decades. But to a more arrogant embolden extent within the past seven years under the current Bush/Cheney administration, than any other time in our history.

Now the public can start asking themselves why?

Most citizens became hysterical about morals and values, if it was not to what their morals or values were, which quickly morphed from truthful, trustworthy and honest to picking sides, either you believe "What Bush says" or you believe what I say, "My side." They felt like most people do, that morals are about all the good things in life and family values. And there is no way that a President of the United States or his administration would sell us down the river, with lies and deceit, or manipulate us into believing lies. No, this was not possible...?

The predicament that we are in however is that people always have a different definition of what good, bad, and family values actually mean. People usually relate only to what they have been taught by their parents, their religion, and/or their government.

This problem has existed from the beginning of time. But with so much disinformation lately and divisive misinformation (propaganda) repeated until it is accepted as truth, there was not much room for people to see

where and how they were manipulated, not only by conditioning through living, but within the past seven years by the government and the mainstream media reporting all of this misinformation.

And it does no good that human nature is such that no one wants to own up to being taken advantage of, but that is exactly what happened, we all were deceived!

As these people (I have been calling them elitists/scams) are being exposed the common refrain from most people is still, "All the politicians do it, what can I do about it?"

That however is not TRUE and never has been true, all politicians do not do it! Yes, there are immoral people in our country, our world, and there always will be. Specifically in our government today and there have always been other people that control these government officials with the promise of more power and more money that these individuals hunger for, and will lie to get. Some of these people are called lobbyists, the big money people, big corporations, scurrying around Washington D.C. like roaches. They have always been there donating money to the elections of individual candidates, who in turn expect favors to be given to them. These elitists get these favors by way of new laws and legislation passed by our House of Representatives, in favor of individual corporations and private contractors. And of course our current Representatives Bush and his administration get inside information that will benefit them monetarily, through stock investment in those companies. This is just like insider trading in the stock market. This is illegal! The elitists that control our government today have done nothing for the good of the citizens, their constituents, but only for themselves and their families...

Not all politicians however are in on the deceit and manipulation. There are still some honest and hard working men and women running for office and currently in our government that are truly going to work for us, the American public. As it always should have been!

We do not have to start all over again, there is a way for citizens/patriots to come together and take back our government and our nation. We the citizens are the ones that dropped the ball here...

We cannot be afraid of speaking out about what we have learned to be true. We must prosecute and convict all who are found guilty of wrong doing in our current government. You must not look the other way this time...this is truly about our future, not just our children's. Sign-up to impeach Bush, Cheney and their entire administration! Let us all hear the real truth...

The "End of America," is here and now, it is the representatives that were elected to protect our rights which in fact are the terrorists of our country and its citizens. We must turn the tide NOW!

First you must educate yourself to what really has been going on in the current administration and our government. Do not waste your time with criticizing the government and then blame someone else for what type of government we have. Stand up and be counted, VOTE!

Electing a new President and getting a new administration will only be the start of repairing the enormous damage that has been done to the U.S. Constitution and the citizens. We as citizens must continue to evaluate our government and make adjustments when necessary.

Every citizen needs to educate themselves about our government. Every citizen that lives in America must learn how to govern their country, not just criticize – this includes voting. Just criticizing the government to your friends and neighbors will not get our nation back to where we should have been by now, this is the 21st Century. But I continue to see us going backwards in time...

We never quite reached that goal in America, even though many have tried...to secure love, peace, and justice for all, under a self-governing democracy - which should not have been ruled by any other state or entity and we

having had supreme authority or power over what happens in and to our country. This is what sovereign means as an adjective...as a noun in politics however it means monarch: the ruler or permanent head of a state, especially a king or queen.

I think that our current representative is taking the noun version of sovereign and trying to place himself as the KING of America, the one and only ruling monarch. What do you think?

In a democracy, you do truly get the government you deserve. And there are many types of Democracies around the world. Look it up! Which one do you want to live in...you do not have too much time to think about it however...time is almost up.

It is up to the citizens to stand-up for and fight to get our nation back into our hands...to announce to the world that we will not tolerate evil, dishonest, manipulating, and traitorous shenanigans with our constitution and by our government representatives.

We the citizens were always suppose to have been the guardians of our Constitution and the Bill of Rights for America. We have either forgotten or expected someone else to do this job for us without overseeing and controlling this process, and most of our young people today do not even know what the U.S. Constitution is all about...

In somewhat the elitists own words it is time to, "Chase these terrorist out of our government...out of our country!" Stand up and be counted...be one of the patriots.

My advice, stay away from electing someone that has been part of the past decade of deceit and manipulation. Vote for the unknown person, someone who has had to struggle without money, who has had to fight for personal justice and fairness in their personal life, who has had to work for a living to put food on the table, and made it to the point were it was possible to become our next leader and a fellow citizen that will stand up for all of us. Stay away from the people that only tell you what you want to hear so they can be elected...

In the words of a person that is no longer on this earth, but sang the words in many a song, "Give Peace A Chance,"...give that candidate a chance...VOTE for Senator Barack Obama.

It is not just I, an unknown that feels the time for change has come, Former President John F. Kennedy's daughter agrees with me...

Endorsement and quote by Caroline Kennedy:
www.comcast.net News

Obama gained an endorsement from Caroline Kennedy, who likened the Illinois senator to her late father, President John F. Kennedy.

"I have never had a president who inspired me the way people tell me that my father inspired them," she wrote on The New York Times op-ed page. "But for the first time, I believe I have found a man who could be that president — and not just for me, but for a new generation of Americans."

That's all for now folks, Chris the Abducted Alien
