

Eugenics in the 21st Century

Posted by Chris the Abducted Alien
October 23, 2009

Notice how pharmaceutical companies have been inundating the airwaves (commercials) with their products? And some media news stations are doing the same with the need for vaccines and pills...

It is to condition the unaware population to purchasing or following their warnings or advertising....this has been going on for decades.

The pharmaceutical companies make billions of dollars off us every year when we purchase pills and vaccines we really do not need. Even to a point where the side effects are more dangerous to us then the medication we are asked to take...

There is also a little known FACT that there have been Eugenic people, Eugenics groups and organizations that see this as a means for population control of the earth...this has been going on for centuries. And continues into the our century...

I know this may sound crazy, but there is some truth to the conspiracy theories that have been flying around in cyber space.

Go to the ***Georgia Guidestones*** to read how the U.S. and the world need to control the population, not only in the world, but the United States. The stones are the modern day Stonehenge built by a union mason and erected in *Elberton, Georgia USA*. It outlines population control of the earth. The ***Bilderberg Group*** has meetings every four years, this is one of their topics.

There are many ways to achieve population control. For example: give people medication that may or may not cure them (but possibly kill them), wait to rescue people that are part of an environmental disaster, lie to them about wars, put fear in them to follow the governments agenda, I could go on, but I hope you get what I mean.

Some of the articles/blogs are way out there with opinions by one person, I usually do not pay attention to this. Others are from scientists, noble peace prize laureates, doctors, etc. This is what you should pay attention too!

I have a good friend that is a scientist at a pharmaceutical company here in the Chicago land area. I always call her when a doctor prescribes pills to me. She usually tells me to not take the pills, and tells me of alternatives.

I have taken very few pills and never any vaccines my entire adult life. I am healthy today, except for the damage I did to my body in the construction profession. No cancer, no diabetes, etc.

Is this just hopeful thinking on my part, or is there something to be said about not doing what others continue to tell you, "It's for your own GOOD!" and then not doing it.

There are things that we do to ourselves that we know are not good for us, but we do them anyway. Of course there will be side effects from this, but it was our choice...

Do not allow the government to dictate what vaccines or medications we should take...fight to bring back our constitution, participate in voicing your dislike for mandatory vaccinations and anything else that would take away our right to be FREE in this country.

The government tried to have me take mandatory vaccinations with my recent ordeal fighting my deportation as an illegal alien living in the United States. I refused and told them I was **not** going to do it. They have every illegal caught in the U.S. take over 32 vaccinations before applying for naturalization as a legal resident in the U.S. This is part of the new immigration laws signed into effect by President Bill Clinton with the Patriot Act...

I would rather be deported to a country I never lived in. My attorney understood and helped me fight...I won to stay in the U.S. without vaccinations!

What do you think the side effects of all the vaccinations the illegal aliens will have to take are going to be...if they want to continue living in the America?

One good site to go to is Peers: People Who Want To Know <http://www.wanttoknow.info/> Type in the subject in their SEARCH bar and you will get tons of articles from well know sources.

Or you can GOOGLE any topic to find out more...

My Warning: Stay away from vaccines and pills if at all possible...

Chris
