

"An exceptionally well written tale! The characters are well drawn and the scenes are beautifully described...This is quite frankly a spell-binding first book."

Firstediting

"A solid read with good characters whose interaction gave greater depth to the story."

T Brady - TCM reviews

"Whiteway's crisp description of the Kelanni world is impressive...His rich vision of the environment is filled with references to foreign creatures, artifacts and language, all of which are blended seamlessly into the work. The result is a chance for the reader to use ones imagination and create the world however it feels right. It's an incredibly effective use of creativity...an excellent read."

G J Haugland - Allbooks Reviews

"Definitely a page turner. Every scene, every passage and every page advances the plot...The author very skillfully reveals background information as part of the action...Great book. Well worth the read."

P H Tang - PHT Reviews

Mark Whiteway lives in rural West Sussex, England, near the former home of H G Wells. A lifelong devotee of H G Wells and Jules Verne, this is Mark's first science fiction novel, built around the concept of negative matter—an extension of Einstein's Theory of General Relativity. Mark lives with his wife Sandra.
