

ARTS & CRAFTS /CANDLES

ARTS & CRAFTS - Extending the life of your candle - As the candle burns, you will want to 'hug' your pillar. Basically, this involves cupping your hands around the outer rim of the candle and gently running your thumbs around the edge of the top of the pillar, pushing in slightly to form a ridge. This helps to completely burn your pillar, evenly and thoroughly, leaving no wasted or unused wax thus extending the life of your candle.

ARTS & CRAFTS - Leftover candle stumps - Use them as pin cushions. Needles will slide into material easier.

ARTS & CRAFTS - Longer burning candles – Candles will burn a lot longer if you place them in the freezer for at least 3 hours before using them.

ARTS & CRAFTS - To remove old wax from a glass candle holder, freeze it for a few hours. Then take the candle holder out and turn it upside down. The wax will fall out.

ARTS & CRAFTS – Stop dripping – A candle will not drip when you light it if you soak it for a few minutes in a solution of 2 cups of water with 2 tablespoons of salt.

ARTS & CRAFTS – Trimming the wick - Use toenail clippers to trim candle wicks.
