

Dana Foster knows very little about horses and even less about true love until she meets a horse named Moose. Out of necessity, she comically stumbles her way through the mysteries of everything equine in an effort to train Moose so he would not be sold and lost to her forever.

She has had more than her share of devastation, trying to cope with the loss of her best friend, Gerry White Cloud, as well as the constant reminder of apparently losing her soul mate, Neil Spencer, to another woman. So she turns to Moose and her Native Indian spirituality to help her survive.

However, there is no way for her to know that the mysteries and power of the spirit world would draw her and Neil closer together to share the leading roles in their own present-day Indian legend.

As an Author, Cheryl Bruder got off to an tremendous start. She began by fighting her way into the literary world double fisted with launching her first two books simultaneously. Her talent is ever growing and her list of story ideas is as inexhaustible as her love of horses. She welcomes visitors and messages at her website, www.greathorsestories.ca
